## SECTION 4: First aid measures

### 4.1. Description of first aid measures

- First-aid measures after inhalation : Specific treatment is necessary. In case of excessive inhalation of fumes move the person to fresh air. Call for medical help.
- First-aid measures after skin contact : Immediately flush skin with plenty of water for at least 15 minutes. After contact with skin, take off immediately all contaminated clothing, and wash immediately with plenty of water and soap. Take off immediately all contaminated clothing and wash it before reuse.
- First-aid measures after eye contact : Do not rub eyes. In case of contact, immediately rinse eyes with plenty of water for at least 15 minutes.
- First-aid measures after ingestion : Rinse mouth thoroughly with water. Call a poison center or a doctor if you feel unwell. If swallowed, seek medical advice immediately and show this container or label.

### 4.2. Most important symptoms and effects, both acute and delayed

No additional information available

### 4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

## SECTION 5: Firefighting measures

### 5.1. Extinguishing media

- Suitable extinguishing media : For small fire: Dry sand. Dry chemical, CO<sub>2</sub>, or water spray or regular foam. Alcohol resistant foam. For large fire: Use water spray, fog or regular foam.
- Unsuitable extinguishing media : Do not use a water jet since it may cause the fire to spread. Do not scatter spilled material with high-pressure water streams.

### 5.2. Special hazards arising from the substance or mixture

- Fire hazard : Could be ignited by heat, sparks or flames. Pressurised container: May burst if heated. Might burn but do not ignite readily. Fire produces a combination of irritating, corrosive and toxic gases. Could cause toxic effects if inhaled.
- Hazardous decomposition products in case of fire : Toxic fumes may be released.

### 5.3. Advice for firefighters

- Firefighting instructions : Cool containers with flooding quantities of water until well after fire is out. Withdraw immediately in case of rising sound from venting devices or discolouration from tank. Move containers away from the fire area if this can be done without risk.
- Protection during firefighting : Wear suitable protective clothing. Inhalation of material could be harmful. Do not attempt to take action without suitable protective equipment. For massive fires use unmanned hose holders or monitor nozzles, or withdraw from the area and allow fire to burn. Notify fire brigade and environmental authorities.

Avoid release to the environment. Avoid the spillage or runoff entering drains, sewers or watercourses. Relevant water authorities should be notified of any large spillage to water course or drain.

#### 6.3. Methods and material for containment and cleaning up

Methods for cleaning up : Clean up any spills as soon as possible, using an absorbent material to collect it. For a large spillage, contain the spillage by bunding. In case of large spillages: Keep upwind. Use suitable disposal containers. Avoid generation and spreading of dust. If spillage occurs on the public highway, indicate the danger and notify the authorities (police, fire brigade).

Other information : Dispose of materials or solid residues at an authorized site.
